

GSU Math and Statistics Club Presents:

Friday, October 5th @ 1PM

in COE 796

***A Few Thoughts on How to Transfer Your Math Skills
to Economics and Finance***

ABSTRACT:

Learn about the Federal Reserve Bank of Atlanta, the Federal System, and how math and statistics can be applied to financial aid and economic policy decision making and supervising and regulating financial institutions. Also, learn about the jobs and careers that are available to mathematicians in the fields of economics and finance. Find out what additional skills are needed to make a mathematician attractive to an employer and to obtain a long, productive career in economics

**Come for pizza and a great seminar,
and bring a friend!**
